

Fifth Review Conference of the States Parties to the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction

3 October 2024

English only

Siem Reap, 25-29 November 2024

Item 8(c) of the provisional agenda

Review of the operation and status of the Convention

Clearing mined areas

Updated Work Plan

Submitted by Ukraine*

1. The decision taken by the Twenty-First Meeting of the States Parties on the request submitted by Ukraine for an extension of the deadline for completing the destruction of antipersonnel mines in accordance with Article 5 of the Convention¹, indicates that:

“In granting the request, the Meeting, in noting the volatility of the present situation in Ukraine and the need for Ukraine to adjust its work plan, noted that the Convention would benefit from Ukraine submitting to the States Parties by 30 April 2024, and each subsequent year, an updated detailed work plan containing, amongst other: a) an updated list of all identified mined areas in accordance with IMAS (i.e. disaggregating by ‘suspected hazardous areas’ and ‘confirmed hazardous areas’ and their relative size, as well as by the type of contamination (e.g. antipersonnel mines, anti-tank mines, explosive remnants of war etc.); b) annual projections of the areas where survey and clearance efforts will take place by which organisations and the methodologies to be employed; c) annual plan for context-specific mine risk education and reduction in affected communities and methodologies to be employed; d) how priorities have been established, and; e) a detailed budget for implementation.”

“In granting the request, the Meeting further noted that the detailed work plan should also contain information on how Ukraine ensures consideration for gender, age, disability and takes the diverse needs and experiences of people in affected communities in its implementation efforts.”

2. Ukraine’s Updated Work Plan was received on 17 May 2024.

* The present document is being issued without formal editing.

¹ APLC/MSP.21/2023/18.

Project

Annex 1

**The Work Plan for Humanitarian Demining
of De-occupied Territories of Ukraine for 2024
(hereinafter referred to as - the Work Plan)
(With annual updates to the plan until 2032)**

1. This Work Plan, which was approved at the meeting of the National Authority on Mine Action on December 22, 2023, outlines the humanitarian demining activities planned for 2024.

The Plan is subject to annual updates until 2032, aiming to ensure the most effective fulfillment of Ukraine's obligations under the Article 5 of the Convention on the Prohibition of the Use, Stockpiling, Production, and Transfer of Anti-Personnel Mines and on their Destruction (hereinafter referred to as the Ottawa Convention) during the extended period of these obligations.

2. The Work Plan aims to achieve the following results:

- a) To reduce the risks posed by explosive ordnance to a level that is safe for the life and health of the population, thereby enabling the economic utilization of the natural resources from cleared territories.
- b) To minimize and prevent accidents from unauthorized handling of explosive ordnance.
- c) To reduce social tensions among populations residing in or near areas contaminated with explosive ordnance.

3. The main tasks to achieve the abovementioned results are defined in the following directions:

- a) Preparation for the demining of contaminated territories.
- b) Conducting humanitarian demining of the landscape and objects in the liberated territories of Ukraine.
- c) Quality control of the cleared territories.

4. The activities outlined in the Work Plan will be implemented in accordance with the Procedure for Carrying Out Humanitarian Demining of Liberated Territories of Ukraine, which defines the following:

- a) **General rules for conducting humanitarian demining.**

- 1) Only the executors of measures in the field of mine action that have acquired the status of mine action operators, both non-governmental and governmental, are allowed to implement the measures of the Work Plan.
- 2) Non-technical/technical surveys and clearance (cleaning) are conducted only in the areas beyond military locations and engineering barriers, and all operations must be coordinated with the military command. Access to perform non-technical/technical surveys and clearance within 20 km of the actual front line and state border is prohibited.
- 3) The military command has the authority to unilaterally **prohibit** the operations in certain areas if the security situation deteriorates or during actions to counter Russian aggression.
- 4) The destruction of explosive ordnance, identified by mine action operators, is carried out by demining groups of the Armed Forces of Ukraine, the State Special Transport Service, and pyrotechnic work groups from the State Emergency Service.
- 5) After completing the formation and certification as a mine action operator by the authorized unit of the State Special Transport Service, and upon registration of mine action operators by institutions and organizations, the Ministry of Defense (through the Mine Action Center) redistributes tasks related to non-technical surveys and clearance.
- 6) Reporting by mine action operators and their interaction with the National Authority on Mine Action is managed through the Mine Action Center and the Secretariat of the National Authority.
- 7) The mine action operator (authorized unit) that has identified potentially contaminated/contaminated territories is responsible for establishing, maintaining, servicing, and restoring the marking system.
- 8) When identifying the borders of potentially contaminated/contaminated territories, it is prohibited to cross the other such territories. If necessary, the re-registration of potentially contaminated/contaminated territories should be carried out. When new potentially contaminated/contaminated territories are identified by multiple organizations, the Ministry of Defense decides on further actions. These decisions consider the resources available to mine action operators and the situation around the territory (except for areas designated for demining by units of the Armed Forces, the State Special Transport Service, and the State Emergency Service).
- 9) Decisions on the redistribution of clearance tasks of potentially contaminated/contaminated territories and the determination of the mine action operator to carry out further humanitarian demining activities are made by the Ministry of Defense (in agreement with the State Emergency Service and military command as needed), **based on:**

- An application from the mine action operator;
- The lack of sufficient resources for the mine action operator to perform the tasks (except for authorized units of central executive bodies);
- Registration of a new mine action operator;
- Changes in the situation and security conditions in the areas defined in the Plan, and considering other factors that may affect task execution.

Note: *The specified Procedure for Carrying Out Humanitarian Demining of Liberated Territories of Ukraine applies equally to all legal entities that have obtained the status of mine action operators.*

b) Procedure for Conducting Initial Non-Technical Survey (NTS) of Territorial Communities

The Mine Action Center (MAC) assigns a mine action operator (MAO) a territory for conducting NTS tied to the smallest administrative-territorial unit — a territorial community with a clearly defined geographical perimeter. After conducting NTS at the level of the minimum administrative-territorial unit - territorial community, the MAO, in accordance with the State Standard of Ukraine (SSU) 8820, submits a report on the completion of NTS to the MAC or the Center for Humanitarian Demining (CHD) with the fixation of the following criterias:

- All populated areas within the community, within the defined geographical perimeter, were surveyed during the NTS.
- All potential key informants were interviewed for evidence of possible contamination.
- All accident sites within the community were processed according to the State Mine Action Information System (SMAIS) and other sources during the NTS.
- All existing requests/applications from the MAC (CHD) (local administration/additional information sources identified by the MAC (CHD) in the territory of the community were processed.
- Reports of identified Suspected Hazardous Areas (SHAs) / Hazardous Areas (HAs) within the community were formed, entered into the SMAIS, and validated by the MAC.
- All territories with reported potential contamination were visited during the NTS.
- All identified SHAs/HAs were marked on the ground to reduce the risk of local population entering dangerous areas.
- Local authorities were informed about the NTS conducted in the community and its results.

The compliance with these criteria confirms that the MAO in the specified community has completed all actions during the NTS as of the report date, and the initial NTS (within the territory of the populated area with a clearly defined geographical

perimeter) is considered completed on the date of the report. The report is provided in electronic form through the SMAIS and is duplicated in paper form signed by the head of the MAO responsible for conducting the NTS.

The report format is determined by the MAC (CHD) and agreed upon by the Secretariat of the National Mine Action Authority (NMAA).

Along with the report, the MAO provides information on the total area of the community (within the territory of the populated area with a clearly defined geographical perimeter), the total area of identified SHAs/HAs, and the difference in these values. The difference between the specified values is considered to be the area of the community's territories (within the territory with a clearly defined geographical perimeter) that contains no evidence of explosive ordnance contamination.

After verification of the reports, the MAC informs the NMAA Secretariat and the relevant territorial community about the completion of the initial NTS and monitors the communities (limits of populated areas, limits of territories with clearly defined geographical perimeters) where the initial NTS has been completed.

In the case of updating analytical data on explosive ordnance incidents among the population (other than violations of security measures) or in case of the concentration of operational calls for discovered explosive ordnance at a specific location, the MAC may assign NTS tasks to specific sections or specific populated areas.

The MAC determines the conduct of repeated NTS by the resources of another MAO, in case of detection of a concentration of unexploded ordnance, leftover ammunition within 100 square meters, groups of mines, or minefields within the community (within the limits of populated areas, within the limits of territories with clearly defined geographical perimeters) under monitoring.

c) Procedure for Conducting Repeated Non-Technical Survey

A repeated NTS is carried out when updated information about the dangers associated with explosive ordnance or the absence of such dangers on a previously identified section of territory is received.

The repeated NTS is conducted by the MAO in agreement with the MAC to clear previously identified SHAs/HAs without carrying out technical survey (TS) processes, demining, or clearance of combat operation areas (COAs), based on updated analytical or technical information (including using unmanned systems) about the absence of evidence (direct and indirect) of explosive ordnance according to the national standard SSU 8820:2023.

d) Procedure for Authorizing Operators to Conduct Humanitarian Demining Activities

1) Following the evaluation process (certification) by an accredited conformity assessment body, within 7 days, the MAO is listed by the NMAA Secretariat and gains access to the information management system.

2) Simultaneously, the MAO informs the MAC in writing about readiness to perform

tasks according to certified MAO processes. In this letter, the MAO provides information about available human resources, equipment, and logistical capabilities.

3) The MAC, within no later than 3 days, analyzes the information received from the MAO and allocates populated areas and potentially contaminated/contaminated sections, about which it informs the NMAA Secretariat and the MAO (after coordination with the NMAA Secretariat).

4) The MAO confirms readiness to start work on assigned tasks, informing the MAC by providing a written notice specifying a clear list of locations for activities, a nominal list of personnel, a list of equipment and machinery to be involved, and the methods of task execution.

5) Within no later than 3 days from receiving the notice from the MAO, the MAC prepares a directive for the MAO, specifying the interaction procedure with the MAC, regional military administrations (RMAs), and combined territorial communities (CTCs), geographical information regarding the location of the task, terms, reporting procedures, and the procedure for informing about problematic issues.

After the directive is signed, the MAC informs the NMAA Secretariat about the start of the MAO's operations, particularly through the information management system.

6) After receiving the order from the MAC, the MAO organizes interaction with the relevant RMA within 1-2 days (in particular, through operational groups for the coordination of MAO activities) and receives passes, if necessary. Local authorities, considering the tasks defined by the MAC, assist MAO operators in performing the tasks assigned to them, taking into account the restrictions related to countering Russian aggression. The MAO informs the MAC about the organization of interaction.

7) If the situation at the task execution location changes, leading to a suspension of tasks (conducting infrastructure restoration works, countering Russian aggression activities, adverse climatic conditions, etc.), the operator immediately informs the MAC.

The overall duration from the moment the MAO is listed among the operators to the start of task execution by the MAO should not exceed 10 days.

e) Conducting Awareness Activities on the Dangers from Explosive Ordnance and Training on Risk Prevention by Mine Action Operators

Awareness activities on the dangers from explosive ordnance and training on risk prevention related to such items, carried out by MAO operators, are planned and controlled by the MAC through the appropriate unit designated to ensure the conduct of public awareness about the risks associated with explosive ordnance.

Planning takes into account the locations of humanitarian demining activities by MAO operators, the presence of explosive ordnance incidents among the civilian population in the task execution areas.

The MAC, through the appropriate unit designated to ensure the conduct of public awareness about the risks associated with explosive ordnance, coordinates with MAO operators the locations of activities on the dangers from explosive ordnance and training on risk prevention related to explosive ordnance, methods, and target audience.

MAO operators provide weekly reports on conducted awareness activities and training on risks through the information management system. The validation (verification) of data in the reports is performed by the MAC through the appropriate unit designated to ensure the conduct of public awareness about the risks associated with explosive ordnance.

Awareness activities on the dangers from explosive ordnance and training on risk prevention related to such items can be conducted by MAO operators within 20 km of the actual front line and state border, with the agreement of the relevant RMA, considering the security situation, about which the MAC is informed. The acceptability of potential risks for employees is determined by the operator independently.

f) External Quality Control of Demining

External quality control is carried out by accredited conformity assessment bodies.

The MAC, considering the applications from MAO operators, distributes such applications among conformity assessment bodies (with their agreement), about which it informs the NMAA Secretariat.

The list of tasks for clearing potentially contaminated/contaminated territories of Ukraine for conducting external quality control (inspection) of task completion for clearing territories from explosive ordnance can be expanded in case of completion of non-technical/technical surveys and humanitarian demining from clearing potentially contaminated/contaminated territories, as specified in the appendices to the Plan.

g) Monitoring the Compliance of Mine Action Operators with Certification Requirements

Monitoring the compliance of an MAO with certification requirements is carried out by certification bodies according to the requirements of accreditation legislation and relevant national standards by:

- Obtaining information on the compliance of such MAO with certification requirements;
- Control (in the form of surveys and inspections) of work sites, production premises, documentation, processes, procedures, personnel qualifications, and equipment of certified MAO operators involved in performing mine action activities.

Monitoring the compliance of MAO is planned by the MAC in interaction with other certification bodies (conformity assessment) and is coordinated with the NMAA Secretariat.

Planning of monitoring is carried out by the MAC for the period April-October and is specified monthly, taking into account MAO operators that perform humanitarian demining activities as of the monitoring month.

h) Marking Potentially Contaminated Territories /Contaminated Territories (PCT/CT)

Initially, PCT/CT are marked where there are direct and indirect evidences of mines and cluster munition remnants. Marking requirements are mandatory for all MAO operators. Marking is conducted according to the Rules for Marking Dangers Associated with Mines and Explosive Ordnance - War Consequences, approved by the Resolution of the Cabinet of Ministers of Ukraine dated April 17, 2019, No. 372, and the national standard SSU 8820:2023.

RMAs inform the MAC about the need for marking identified SHAs/ZTs by MAO operators.

i) Reporting

Reporting by MAO operators is carried out through the information management system according to the forms established by the MAC.

The MAC conducts validation (verification) of reports and visualizes data in accordance with requests provided by the NMAA Secretariat.

A summary of information regarding the conduct of non-technical and technical surveys, demining/clearing of territories, external quality control (inspection) of task completion for clearing territories from explosive ordnance, and reports on the completion of humanitarian demining activities are provided by the MAC to the NMAA Secretariat monthly by the 7th day of the month following the reporting month.

5. Regulatory Acts Governing the Organization of Humanitarian Demining Activities in De-occupied Territories of Ukraine

- a) Law of Ukraine "On Mine Action in Ukraine";
- b) Law of Ukraine "On the Legal Regime of Martial Law";
- c) Resolution of the Cabinet of Ministers of Ukraine dated November 10, 2021, No. 1207 "On the Establishment of the National Mine Action Authority";
- d) Resolution of the Cabinet of Ministers of Ukraine dated November 3, 2021, No. 1150 "On the Approval of the Procedure for Registration of Mine Action Operators";
- e) Resolution of the Cabinet of Ministers of Ukraine dated April 17, 2019, No. 372 "On the Approval of the Rules for Marking Dangers Associated with Mines and Explosive Ordnance - War Consequences";
- f) SSU 8820:2023 "Mine Action. Management Processes. Basic Provisions";
- g) International Mine Action Standards (IMAS).

Completed forms established by the general recommendations of the Implementation Support Group of the Ottawa Convention on the development of a draft work plan for the implementation of Article 5 of the Ottawa Convention are attached.

Attachments:

Table 1. Progress made in the implementation of the Ottawa Convention from January 1 to December 31, 2023 (at the district/regional level);

Table 2. Remaining areas with suspected/confirmed contamination by anti-personnel mines (APMs) (at the district/regional level);

Table 3. Details of remaining areas with suspected/confirmed contamination by APMs and the estimated date of completion of work on these areas;

Table 4. General forecasts regarding the number and area of sites (in m²) with suspected/confirmed contamination by APMs, which will be released during the implementation period of the Work Plan.

Annual plan for informing the population about mine hazards for 2024

	Name of the event	Type of the event	Date of implementation	Responsible body
1	Ukrainian communication campaign on awareness of the risks of explosive objects (together with UNDP, BBC Media Action). As part of the communication campaign, content is prepared for various platforms: - boards / posters / visuals of social advertising regarding the rules of safe behavior when detecting explosive objects; - publications in the media and on the pages of the State Emergency Service of Ukraine in social networks; - creation of audio and video clips of social advertising for placement in the media; - preparation and implementation of the course "Mine safety" with placement on the «Diya platform» "Osvita"»	Ukrainian communication campaign	May - August 2024	State Emergency Service of Ukraine
2	Implementation of the "Mine Safety" project together with Unicef Ukraine: - creation of a mobile mine safety game for children; - creation of a web portal for parents and children, which includes issues of mine safety; - printing and equipping 450 safety classes with UNICEF Ukraine printing materials (mine safety materials); - printing and distribution of mine safety posters for children and parents, distributing them in the de-occupied territories and near-front areas; - a brochure for adults "A concise guide for parents. Mine safety: what your child should know and how to tell him about it"; - an online course for rescuers, police officers and educators on the Bezpeka info site "How to teach children mine safety" Implementation of the project "Mine safety"		During 2024	State Emergency Service of Ukraine
3	Carrying out the information campaign "Caution: MINES!"	Implementation of the	During 2024	Ministry of Reintegration

		information campaign		
4	Transmission of text appeals to the population regarding safety measures and rules of conduct when detecting explosive objects through radio nodes of objects with a mass presence of people	Broadcasting of audio files	During 2024	State Emergency Service of Ukraine, Ministry of Defense, National Police, Ministry of Reintegration, local state administrations (military administrations), local government bodies, business entities
5	Development (production) and distribution of printed materials on mine safety in places of mass presence of people, printed media.	Creation of thematic stands, distribution of information and educational brochures, monuments	During 2024	State Emergency Service of Ukraine, Ministry of Reintegration, Ministry of Defense, Ministry of Education and Science, Ministry of Culture and Information Policy of Ukraine, National Police, Mine action center, center for humanitarian demining, Mine operators, local state administrations

				(military administrations) local government bodies business entities (by consent)
6	National, regional and local television channels broadcasting, radio stations broadcasting on safety measures and rules of conduct when detecting explosive objects, social advertising	Preparation of files and airing	During 2024	State Emergency Service of Ukraine, Ministry of Culture and Information Policy of Ukraine, Ministry of Reintegration, humanitarian demining center, National Council for Television and Radio Broadcasting, local state administrations (military administrations) local government bodies
7	Circulation of information on departmental media, Internet resources, social media pages regarding: - mine danger; - online courses for children and adults on mine safety; - informational announcements on conducting exercises in the field of detection, disposal, disposal of explosive objects.	Preparation of information for websites, social networks	During 2024	Ministry of Reintegration, Ministry of Culture and Information Policy of Ukraine, Ministry of Defense, Ministry of Internal Affairs, Ministry of Education and Science,

				State Emergency Service, Mine action center, humanitarian demining center, mine action operators local state administrations (military administrations) local government bodies, business entities (with consent)
8	Conducting informative discussions with children, teenagers and adults regarding safety measures and rules of conduct in case of detection of explosive objects with the involvement of Mobile Safety Classes (mine safety): - conducting excursions for students of general educational institutions to the divisions of the Main Directorate of the State Emergency Service of Ukraine with explanatory information on the rules of behavior when explosive objects are detected; - provision of thematic classes on safety measures and rules of conduct in case of detection of explosive objects in preschool, secondary and higher educational institutions; - preventive work during the summer holidays in children's health facilities and pre-school camps; - providing Life Safety Knowledge Weeks in schools, institutes, vocational and higher education institutions.	Organization of the events, educational work	During 2024	Ministry of Education and Science, State Emergency Service, National Police, Mine action center, humanitarian demining center, mine action operators
9	Updating the content of programs for educational institutions "Protection of Ukraine", in particular in the area of mine protection	Update of educational programs	September 2024	Ministry of Education and Science

10	Approval of State Educational Standards for specific professions	Approval of educational standards	December 2024	Ministry of Education and Science
11	Organization of educational presentations on the development of stress resistance skills as part of workshops on providing psychological first aid in emergency situations: - meetings, briefings, press conferences; - special thematic telephone "hot lines"	Psychological assistance	During 2024	State Emergency Service of Ukraine, Ministry of Health
12	Informing population through SMS notifications (for subscribers of mobile operators) about the need to comply with the rules on handling with explosive objects	messages notifications	Every month	Ministry of Reintegration
13	Interaction and cooperation with Ukrainian and foreign humanitarian public organizations, foundations on the issue of informing the population about the threats posed by various explosive objects	Interaction with non-governmental organizations	On permanent basis	Ministry of Defense , State Emergency Service of Ukraine, Ministry of Internal Affairs, humanitarian demining center, mine action operators, Ministry of Culture and Information Policy of Ukraine, Ministry of Reintegration, Ministry of Education and Science, local state administrations (military

				administrations) local government bodies, business entities (with consent)
14	Free access for population to information about territories contaminated by mines and explosive objects, implementation of humanitarian demining measures, maintaining an interactive map "Information about dangers from explosive objects and risk prevention training" which is posted at the official website of the Ministry of Defense of Ukraine and the State Emergency Service of Ukraine (IMSMA information management system)	Maintaining of the interactive map of the territories contaminated by mines and explosive objects	On permanent basis	Ministry of Defense, Mine action center, State Emergency Service of Ukraine, National body for mine action, humanitarian demining center mine action operators
15	Preparing informational resources for the population on contamination of the territory by explosive objects, on risks associated with explosive objects in the territories where the active phases of hostilities have been completed: - informing the population about the systems for marking dangerous areas established in the respective territories and the measures taken to avoid danger to the population; - prevention of accidents at the locations of detection of explosive objects; - monitoring the condition of the established systems for marking dangerous areas and their maintenance, informing the mine action center and the center for humanitarian demining about cases of their damage, destruction, theft or other cases that prevent further effective use of such systems	Preparing information about the installed systems for marking of dangerous areas	On permanent basis	Local state administrations (military administrations) local governments Mine action center, center for humanitarian demining, mine operators
16	Marking of dangerous areas of the territories, infrastructure facilities and other areas in the de-occupied territories of Ukraine	Marking territories	On permanent basis starting from the date of the end of the	Ministry of Defense, State Emergency Service of Ukraine, National Police, mine action operators

			temporary occupation	Mine action center, humanitarian demining center, local state administrations (military administrations) local governments, business entities
17	Ensuring that the population is informed about the potentially contaminated areas that may pose a risk of explosive objects, marking the territories	Transmission of warning (marking) signs on mine danger to communities where contamination by explosive objects was confirmed	On permanent basis starting from the date of the end of the temporary occupation	Ministry of Reintegration, local state administrations (military administrations), local self-government bodies, business entities
